1. Readme File

- Excellent (2) - Includes a comprehensive overview, project structure, and a detailed summary of the project.
- Satisfactory (1) - Provides the basic information required for understanding the project's focus and structure.
- Poor (0) - Absent, very minimal, or irrelevant.

2. Documentation

- Excellent (2) - Clear documentation both at the level of individual functions or operations, as well as describing the project and analysis performed on the whole.
- Satisfactory (1) - Basic analysis present, but lacks depth or insight.
- Poor (0) - Lacks analysis and insight or is poorly documented.

4. Testing and Sanity Checks

- Excellent (2) - Comprehensive tests verifying key functionalities with clear sanity checks.
- Satisfactory (1) - Basic sanity checks done, but lacks thoroughness.
- Poor (0) - No or very minimal testing, lacking basic sanity checks.

5. Code Quality

- Excellent (2) - Code is free of clutter, with highly descriptive names and a clear, logical structure.
- Satisfactory (1) - Some cluttered or broken code, non-descriptive names or structure could be improved.
- Poor (0) - Significant clutter, poor naming, or disorganized structure, making the code hard to understand.
